Subject: RE: HPNS Concrete Reference Area -REQUEST For Use

Lisa, thanks for forwarding the communication between Matt Liscio (RASO) and Ray Schul.

As you know RASO is a great resource for these projects, but RPM's and the Navy ultimately need to be involved and provide go-ahead in any types of decisions like this. The fact that I'm being clued in on this retroactively is a concern.

I have no concerns with using this as a background reference area.

Best regards,
-Matt Liscio

Subject: [Non-DoD Source] HPNS Concrete Reference Area -REQUEST For Use

Mr. Liscio,
APTIM is requesting the use of an alternate concrete background reference area to support the performance of the scoping surveys being performed on the shipyard's Parcel F structures, the finger piers and sub-pens.

We believe that this location best meets the criteria of use, a location that appears to be like type material that has similar physical and radiological characteristics as the site area being surveyed, and that has not been contaminated by site activities.

The approved use of this location as shown in the attachment, is aligned with the work plan, Section 5.3.2 Concrete Reference Area, which states: "if needed, additional reference areas may be established with the approval of the Navy.

Following RASO approval, the contractor will ensure that "the same survey methods and equipment that will be used for conducting a survey, will be used for the background area data collection".

Sir, If any additional data is required, please contact me.
